PERSONAL STATEMENT

Data Science and AI undergraduate with hands-on experience in data analysis, computer vision, and dashboard development. Skilled in Python, SQL, Pandas, Power BI, and Excel, with practical exposure to data cleaning, modelling, and visualisation through projects and industry simulations. Seeking a Data Analyst or Junior Data Scientist role to apply analytical skills to real-world problems.

EDUCATION

University of East London, UK	January 2025 – May 2027
BSc. Hons Data Science and Artificial Intelligence	Ongoing

SKILLS

- **Data Science & Analysis:** Python (Pandas, NumPy), SQL, Power BI, Excel, Plotly.
- **Programming:** Java, JavaScript, C, PHP, HTML, CSS.
- **Tools & Platforms:** Git, Linux, Apex Oracle, Figma, Blender, MS Office, Flutterflow.
- **Soft Skills:** Technical Communication, Agile Collaboration, Project Management.

INTERNSHIPS

Data Analytics & Visualization Job Simulation Accenture (via Forage)	5 January 2025
• Performed data modelling, cleaning, and visualization to solve simulated client business problems. • Cleaned and analysed datasets using Python (Pandas), SQL, and Excel to ensure accurate insights. • Built dashboards and visual reports to communicate insights and support strategic decision-making. [Excel, SQL, Pandas (Python), PowerPoint]	

PROJECTS

Traffic Analytics using Computer Vision and Data Visualization (GITHUB)	December 2025
• Built an interactive dashboard with Streamlit and Plotly to visualise traffic insights. • Developed a real-time traffic analytics app using Python, YOLOv8, and OpenCV for vehicle detection. • Deployed the application on Streamlit Cloud, demonstrating model integration, data processing, and production-ready dashboard development. [Python, YOLOv8, OpenCV, Streamlit, Pandas, Plotly, SQLite, Git]	

POSITION OF RESPONSIBILITY

IT Head (Board of Directors) Interact Club, Nepal Police School	June 2023 - June 2024
• Maintained the club's IT infrastructure and digital systems, ensuring smooth technical operations. • Led technical initiatives and workshops (Arduino, IoT), mentoring members on hands-on projects. • Managed digital platforms, databases, and online presence to improve coordination and records. [Airtable, SQL, Arduino, Python, Figma, Canva]	
Vice-President Robotics Club, Nepal Police School	May 2023 – May 2024
• Collaborated on the NASA Space Apps Challenge, overseeing project timelines. • Led a team to compete in high-profile events, including the Young Scientist Summit (YSS-2024). • Mentored junior members and led projects like NASA Space Apps Challenge, IoT-Enabled Poultry Farm. [Arduino, Blender, Python, IoT Sensors, Git, Flutter flow, Canva]
